Rivers, Nigeria | 07065912821 | abulamartins@gmail.com | GitHub | Website

Profile

Seasoned Backend Developer with over 2 years of experience in software development skilled in NodeJS and its framework Express. I excel in organizational and communication skills, ensuring seamless coordination among team members. Languages and tools include NodeJS, Express and MongoDB with additional knowledge in Html, Css, Javascript and React.

Work Experience

Backend Developer
Kodecamp

May 2024 - Sep 2024
Akwa Ibom, Nigeria

- Participated in weekly virtual classes with focus on project-based assessment.
- Attended Weekly virtual office hours for mentorship and collaborative problem-solving to address challenges.
- Developed and deployed an API for a final project, hosted on Render, and integrated it with a React.js frontend.
- Led backend development for a personalized meal planning app by creating data models and designing RESTful API endpoints to manage key functionalities.

Fullstack Developer
Elitepath Software

Dec 2022 - Feb 2023
Rivers, Nigeria

- Spearheaded the development of a dynamic blog and e-commerce application.
- Leveraged cutting-edge technologies, including React.js, Node.js, MongoDB, and Express.js.
- Honed skills in both frontend and backend development through hands-on experience with the projects.
- Gained valuable insights into project management and collaboration within a team environment.

Frontend Developer
Ad'mas digital technologies

Sep 2022 - Nov 2022
Rivers, Nigeria

- Conceptualized and developed a comprehensive project during my internship.
- Utilized a combination of HTML, CSS, and JavaScript to create the project.
- Showcased proficiency in frontend web development through the project.
- Demonstrated ability to design and implement responsive and visually appealing user interfaces.
