PROFESSIONAL SUMMARY

Full Stack Software Engineer with years of experience delivering production-ready web applications across frontend and backend systems using **Typescript** and **Nest.js**, with strong collaboration skills and a track record of owning features end-to-end.

SKILLS SUMMARY

Languages: JavaScript, TypeScript

Frontend: React, HTML, CSS, Tailwind CSS

Authentication & Security: JWT, API Keys, OAuth2

Tools & Platforms: Git, Github.

Methodologies: Agile, Team Collaboration, Documentation

APIs & Integrations: Paystack, Google OAuth2

AI & Automation: Gemini AI, Codex, Antigravity

Backend: Node.js, NestJS

Databases: PostgreSQL, MongoDB, MySQL

ORM/ODM: TypeORM, Mongoose, Prisma

Messaging & Caching: RabbitMQ, Redis

WORK EXPERIENCE

ITSkillsCenter — *Software Developer*

Oct 2025 – Present

- Developed and maintain full stack web applications using React, Node.js, Express, MongoDB and TypeScript.
- Build scalable frontend architectures and reusable UI components while integrating RESTful APIs to deliver responsive user experience.

KodeCamp — *Backend Web Developer*

May 2024 – Sept 2025

- Designed and developed scalable RESTful APIs using NestJS and Typescript, following modular architecture and backend engineering best practices.
- Designed relational database schemas and managed data persistence using Prisma ORM with SQLite, ensuring efficient querying, data integrity, and maintainable database structures.

ElitePath Software — *Junior Software Developer & Web Tutor*

Apr 2022 – March 2024

- Assisted aspiring developers in learning software engineering principles, web development technologies, debugging techniques, and best coding practices.
- Guided students through hands-on projects, helping them build practical experience with modern web development tools and workflows.

PROJECTS

Movent (Event Ticketing App)

<https://joinmovent.com>

- Architected and developed a scalable event ticketing platform supporting attendees, organizers, and administrators through role-based access.
- Built secure authentication and authorization workflows including user registration, email verification, password reset, JWT authentication, refresh tokens, and HTTP-only cookie management.

NaijaPrice Tracker (Price Tracking App)

<https://naijaprice.vercel.app>

- Developed NaijaPrice Tracker, a full stack price tracking platform designed to help users compare and monitor prices of goods across markets in Nigeria.
- Implemented scalable frontend architecture using React and Redux, improving application state management, user experience, and efficient handling of dynamic pricing data.
