Lagos, Nigeria
07065912821

PROFESSIONAL SUMMARY

Full-Stack Web Developer experienced in delivering production-ready web applications across frontend and backend systems, with strong collaboration skills and a track record of owning features end-to-end.

SKILLS SUMMARY

- Languages:** JavaScript, TypeScript

Frontend: React, HTML, CSS, Tailwind CSS

Authentication & Security: JWT, API Keys, OAuth2

Tools & Platforms: Git, Github.

Methodologies: Agile, Team Collaboration, Documentation

APIs & Integrations: Paystack, Google OAuth2
- AI & Automation:** Gemini AI

Backend: Node.js, NestJS

Databases: PostgreSQL, MongoDB, MySQL

ORM/ODM: TypeORM, Mongoose, Prisma

Messaging & Caching: RabbitMQ, Redis

WORK EXPERIENCE

- ITSkillsCenter — Software Developer** Oct 2025 – Present

 - Worked in a collaborative development environment while building scalable applications, gaining hands-on experience with state management, component architecture, API integration, debugging, and version control workflows.
 - Contributed to the development of scalable full stack platforms including an ecommerce price tracking application and an event ticketing system, strengthening skills in responsive UI development, backend service, database management, and cross-functional teamwork.
- KodeCamp — Backend Web Developer** May 2024 – Sept 2025

 - Developed a comprehensive Meal Planning API featuring authentication, recipe management, meal scheduling, user preferences, and data validation, strengthening expertise in backend architecture and database design.
 - Collaborated with a team of developers on the development of a distress marketplace application, contributing to user management, profile management, authentication workflows, order processing, and notification systems within an agile environment.
- ElitePath Software — Junior Software Developer & Web Tutor** Apr 2022 – March 2024

 - Built a full stack e-commerce application as capstone project, implementing core features such as product management, authentication, shopping cart, order handling.
 - Supported and mentored junior students during training sessions, assisting with coding concepts, debugging, and practical development tasks to enhance collaborative learning.

PROJECTS

- [Movent \(Event Ticketing App\)](#)

 - Currently developing Movent, a full stack event ticketing platform focused on seamless event discovery, ticket purchasing, and user engagement experiences
 - Designing and implementing both frontend and backend architecture independently, including authentication systems, event management, payment workflows, ticket handling, and responsive user interfaces.
- [NaijaPrice Tracker \(Price Tracking App\)](#)

 - Developed NaijaPrice Tracker, a full stack price tracking platform designed to help users compare and monitor prices of goods across markets in Nigeria.
 - Implemented scalable frontend architecture using React and Redux, improving application state management, user experience, and efficient handling of dynamic pricing data.
- [Notes API](#)

 - Developed a secure Notes Management API using NestJS, TypeScript , Prisma ORM, and MongoDB, enabling users to create,

update, retrieve, and delete personal notes through RESTful endpoints.

- Implemented authentication and authorization workflows to ensure secure user access and protected note management operations.

[Ecommerce API](#)

- Developed a RESTful e-commerce API using Express.js, Node.js, and MongoDB, enabling core commerce functionalities such as product management, user authentication, and order processing.
- Implemented secure authentication and authorization flow using JWT, ensuring protected access to user and admin-only endpoints.

EDUCATION

Rivers State University
Bachelor of Computer Science

Rivers, Nigeria
Nov. 2016 - August, 2019

CERTIFICATE

[NodeJS Beginner](#)

[NodeJS Intermediate](#)
